

Customer sentiment is up 8 points. Onboarding is what stands between us and the next gain.

NPS rose from 39 to 47 across 1,240 responses. Customers credit our support team more than anything else; the friction they name most often is getting set up.

WHAT CUSTOMERS TOLD US

Share of respondents mentioning each theme.

RECOMMENDATIONS

01 Simplify the setup wizard

Onboarding complexity is the most-cited complaint, raised by 38% of respondents. Reducing setup effort addresses it at the source.

02 Add in-app guides

Give new customers help at the point of need, so getting started depends less on working it out alone or contacting support.

03 Keep support staffing

Support responsiveness is our most-praised strength, cited by 61%. Hold current staffing to protect it while onboarding improves.
